ACCOUNTS WITH THE ASSUMED TRIGGER

The DACH door is a change event instead.

Who I am, and what I bring.

PHOTO

Consulting, venture capital, and now founding. All of it in the last three years.

EXPERIENCE

SQRlane Founder, since Aug 2026
AI agents for freight forwarding. Displacing spreadsheets and hours rather than a competing tool.

SCAILE Technologies Strategy, AI and go-to-market, 2026
B2B go-to-market engines built from scratch, from ICP research to outbound to AI search visibility.

Alvarez & Marsal Restructuring, 2024
Advised Fortune 500 CEOs on restructuring financial liabilities worth over $100M.

Biome VC Venture capital, 2023
Built the investment thesis that shaped how a $170M fund picks companies.

EDUCATION

Nova School of Business and Economics, Lisbon MSc Finance
Top 10% of class. Ranked #8 worldwide by the Financial Times.

National case competitions 15,000+ participants
Won top prize. The same instinct that produced the three findings in this deck.

WHY LIO

1 **Shortest path to founding my own.**
I am building SQRlane, AI agents for freight forwarding. Same bet as Lio one category over: a labour problem nobody has priced. I would rather learn how that scales inside your founders' office than guess from mine.

2 **Lio sells against a $180B line, not a $10B one.**
Everyone else builds procurement software. Lio replaces the execution labour at roughly 7% of the cost. It is the sharpest enterprise wedge I have seen since I started working in GTM.

3 **I have already done the work.**
219 named buyers of 2,245 identified, a 17-event programme re-verified against organiser sources, a 60-post share-of-voice audit, and a falsifiable GTM hypothesis with kill criteria. All before day 0.

DAY-TO-DAY STACK

Claude Code · Apollo · Clay · HubSpot · Figma · Webflow · Notion · Sheets

khan.abirhilal@gmail.com
Free from September · on-site in Munich

The what, why and how.

How this deck is structured, and what I would drive once I join the team.

HOW THE DECK IS STRUCTURED

THE SHORT VERSION

Three findings built from public sources before day 0, one machine to run them, and one ask priced against what that machine returns.

WHAT I WOULD GO AFTER

SHORT TERM

Own event ops end to end for Q3 and Q4. Target lists per room, founder briefs, the sidecar dinners, and the next-day follow-ups nobody has time for.

Stand up the outbound engine. Keep the named-buyer list alive in Apollo, feed sequences with the AEs, and report what converts.

Give Keil and Wagner leverage. Prep, notes, pipeline hygiene and the analysis layer of the $10M Challenge. Founders get hours back, every week.

LONG TERM

Own a slice of the US field engine as the NYC pod scales. The Q2-27 calendar already requires a field-marketing layer.

Run the displacement campaign end to end, from the SSOW and SIG rooms to qualified pilots. The 93%-cheaper story deserves its own funnel.

Earn ownership of a revenue line, the way Lio defines new roles for its own customers.

THE MACHINE THOSE FINDINGS FEED

Calendar — 17 P1 events, dated → (WHO TO SEAT) → **Target list** — 219 named buyers → (MEETINGS BOOKED) → **The room** — brief, live demo, dinner → (CONVERSATIONS) → **Follow-up** — inside the same week → (NAMED ACCOUNTS) → **Pipeline** — logged, named, costed

Outcomes rewrite who gets targeted next

Every step exists today. The dashed edge does not, which is why each renewal is argued from memory rather than from what the last room produced.

Structure follows the three themes set for this application: who I am and why Lio, what I would own from day 0, and why hire me.

The market is countable. The trigger is not the one the plan assumed.

219 named buyers are ready for outbound. The renewal trigger behind them holds in FS and the US, and breaks in DACH.

SEGMENT	BUYERS	NAMED	THE BUYING CENTRE	HOW TO APPROACH
DACH industrial backbone Searched €1-12B · **bullseye €2.8-4.7B, 8-30K staff**	**851** IN APOLLO	**60** ON THE LIST	**CPO sponsors, COO or CFO signs** via the SSC and FTE line. Procurement Excellence champions, CIO gatekeeps.	**Trust-first, German, in person, timed to a change event.** The DACH trigger is the captive SSC, not a BPO renewal: carve-outs, post-merger integration, hub migrations.
Insurance and financial services 100% indirect spend · Munich Re, ERGO class	**156** IN APOLLO	**40** ON THE LIST	**Head of Procurement or Sourcing and Vendor Management.** Compliance-heavy, auditability opens the door.	**Where the real renewals sit.** Zurich-Genpact, running since 2012, is the one confirmed third-party procurement BPO in 35 swept accounts.
US F500 GBS and BPO owners The people who sign outsourcing renewals · SSOW and SIG audience	**895** IN APOLLO	**60** ON THE LIST	**VP GBS, Head of P2P, GPOs.** A persona classic procurement marketing barely reaches.	**Budget capture, and the segment where renewals actually concentrate.** Every renewal is a qualified opportunity with a price to beat by 93%.
DACH utilities and mobility Regulated, process-heavy · Deutsche Bahn, SWM, Lufthansa class	**343** IN APOLLO	**59** ON THE LIST	**Leiter Einkauf** plus digitalisation leads. Works councils in the room from day one.	**Follow the Deutsche Bahn breadcrumb.** Regulated buyers move on references and auditability.

219
NAMED BUYERS
122 COMPANIES

The outbound cold-start problem is solved before day 0. Every contact carries title, company, location and LinkedIn URL. 193 carry verified work emails, including prospect CPOs at Allianz, Deutsche Bahn, E.ON, ServiceNow, Citi, Beiersdorf and Miele. Apollo identifies **2,245 titled buyers** on the same filters, so the refill pool is documented and reusable.

H1 RADAR SWEEP

35 accounts swept for BPO and SSC evidence: **one true third-party procurement BPO** (Zurich-Genpact) plus one Accenture JV, 4 captive centres with a live change event, 16 stable captives, 9 clean controls. **The DACH displacement target is the captive SSC, which has no renewal date,** so the trigger there is a change event and the renewal-timed motion belongs to FS and the US.

KHAN.ABIRHILAL@GMAIL.COM

Sourced via Apollo, 31 August 2026. Search totals are Apollo database counts, not TAM. Radar sweep and evidence grades per Lio_H1_Test_Scorecard.csv and 17-gtm-hypothesis-and-test-roadmap.md.

The rooms are picked and the dates hold. The programme needs one owner.

€929K and 204 staff-days across 17 events, with four starting in two weeks and no single owner below the founders.

	Q3-2026 · IN 2 WEEKS	Q4-2026	Q1-2027	Q2-2027
The gauntlet runs 4 P1 events plus Bots & Buyers NYC. 18 days, 2 continents.	SSON San Diego · Sep 14-17	SIG Fall Chicago · Oct 25-28 · Petras	ProcureCon West Vegas · Mar 8-10	Handelsblatt Apr 6-7 · Gartner May 3-5
	+ Bots & Buyers NYC · Sep 23 (own)	SSOW DACH Berlin · Nov 17-19	SSOW Orlando · Mar 8-11 · BPO keynote	eLösungstage May 11-12 · WPC May 18-20
	ProcureCon EU Köln · Sep 22-24	BME-Symposium Berlin · Nov 18-19	APC · Mar 22-24 · now New Orleans	DPW NY Jun 2-3 · Proc. Summit Jun 23-24
	ProcureCon East Boston · Sep 28-30 · lead	Berlin double-week holds. B&B EU Munich collides with SIG Chicago. **Split settled: Petras to Chicago, Keil and Wagner to Munich,** conditional on SIG scheduling the buy-side session Oct 25-26.	Same-week collision resolved: Keil to Orlando, Petras to Vegas.	7 events. Breaks the current team without the Jan-27 field-marketing hire.
	DPW Amsterdam · Sep 30-Oct 1			
	€165K new + €70K committed · 65 staff-days	€87K · 32 staff-days · cheapest, sharpest	€108K + €35K committed · 31 staff-days	€376K · 76 staff-days · the heavy quarter

STATUS CHECK, SIX WEEKS AFTER THE PLAN WAS WRITTEN

All four gauntlet dates hold. New since the plan: **Bots & Buyers went transatlantic.** NYC Sep 23 lands mid-gauntlet and the EU flagship Oct 27-28 collides with SIG Chicago, now settled. APC 2027 moved to **New Orleans**. The NAPES move to Denver is **unverified,** so hold the €35K. Two early-birds close **Sep 30.**

17

P1 EVENTS Q3-26 TO Q2-27

€736K new plus €105K committed plus contingency, about €929K. 204 staff-days. 10 sidecar dinners, €120K of the total and the line to protect last.
The 17 verified customers cluster at **€2.8-4.7B revenue and 8-30K staff,** exactly the German practitioner fairs' demographic. The US circuit aims a tier higher against zero verified US customers.

SPONSOR · THE CPO

Handelsblatt, WPC, DPW and the dinners. Owns the mandate and converts in closed rooms.

ECONOMIC BUYER · COO OR CFO

SSOW three times, SIG, SSON San Diego. Signs when the BPO or FTE line moves.

CHAMPION · PROCUREMENT EXCELLENCE

The German BME fairs. Runs the evaluation and the pilot.

GATEKEEPER · CIO OR CISO

BME IT-Sourcing, SAP Connect, Gartner. Cannot say yes, can say no.

The buying committee has four seats and no single event reaches more than two. Preparation differs per seat, which is what the T-7 brief is for.

Figures from the Lio P1 budget and staffing plan, July 2026, mid-range estimates. Dates re-verified against organiser sources on 31 August 2026. Seat map per 20-event-strategy-and-icp-baseline.md.

One voice carries the category, and the customer wall is silent.

60 indexed posts. Keil authors 40% of them, and customers author none.

POSTS FOUND, BY WHO IS TALKING

Vladimir Keil (CEO) the channel, effectively	24
Lio company page including the askLio era	9
Third-party commentary analysts, influencers, reactions	9
Heinzmann and Wagner CTO and COO	7
Lio team Petras, new-hire posts, FDE Night	7
Investors and network YC and a16z orbit	4
Customers despite a 150+ enterprise logo wall	**0 posts found**

Found via search-engine indexing of linkedin.com, so this is a floor rather than a census. The login wall hides an unknown share of posts.

One voice carries 40% of the channel

Keil authors 24 of 60 indexed posts, and the founder team together 31. That is a single point of failure, and also the cheapest amplifier available. Founder-content ops multiplies an asset that already works.

The logo wall is silent

Zero customer-authored posts, despite award-grade stories at Schaeffler, REHAU and Surventis. Every go-live, award and dinner should ship with a co-marketing ask. Nobody owns that ask today.

Moments, not a cadence

Activity spikes at the YC launch, the BME award and the Series A, then goes quiet. The 17-room calendar is a built-in content engine if every room produces posts before, during and after. That loop needs an owner.

60

DISTINCT POSTS IN THE REGISTER

Share of voice is founder-heavy and customer-silent. That is an ops gap, not a budget gap, and the events to content to advocacy loop I would run closes it. Full register with URLs, authors, dates and themes ships as 14-linkedin-posts.md.

Compiled via an 8-angle search sweep. Dates decoded from LinkedIn activity IDs. Logo count, awards and customer facts per the Lio site, newsroom and press, August 2026.

What I would own, and how I would ramp.

The machine between the founders and the pipeline: the list, the rooms, and the follow-through.

WHERE I GO DEEP

Event operations — DEEP

Target lists per room, founder briefs, the sidecar dinners, and the next-day follow-ups. 17 rooms and 10 dinners currently have no owner below the founders.

Outbound engine — DEEP

The 219-name list stays alive in Apollo, sequences run with the AEs, and every cohort gets a report on what converted and what did not.

The H1 test — COVER

Renewal Radar maintained, change events tracked, loss reasons logged. The hypothesis reaches its decision gate with real data behind it.

Founder leverage — COVER

Prep, notes, pipeline hygiene, and the analysis layer of the $10M Challenge. Hours back for Keil and Wagner, every week.

THE RAMP

DAYS 0-30

Run the gauntlet.

Four P1 events plus Bots & Buyers NYC in 18 days across two continents, starting in two weeks. The buyer list goes into sequences before the first flight.

DAYS 31-60

Work the wedge quarter.

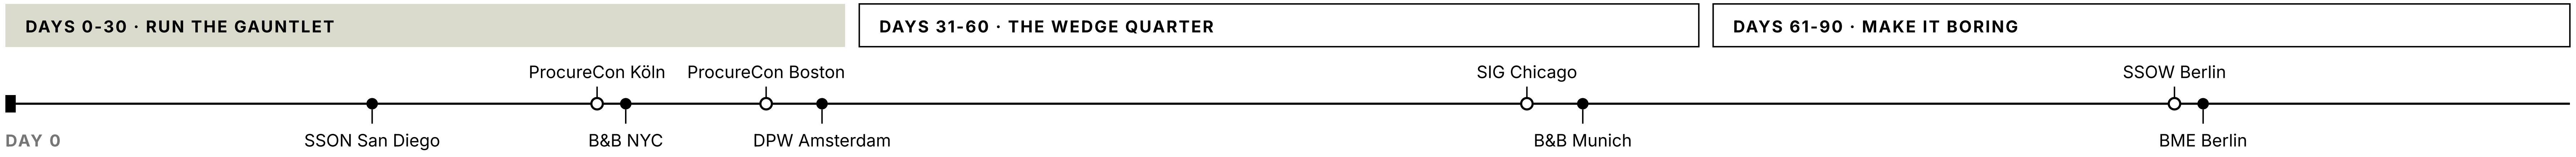
Berlin double-week and SIG Chicago, the rooms where the budget owners sit: third-party BPO in the US and FS rooms, captive SSC and GBS heads in the DACH ones. First outbound-cohort report ships.

DAYS 61-90

Make it boring.

Calendar to list to room to follow-up to pipeline, measured weekly and running without heroics. The Q1-27 US quarter starts planned, staffed and booked early instead of rushed.

THE RAMP, AGAINST THE DATES THAT DO NOT MOVE



The first thirty days are not onboarding. Five rooms land inside them, and two early-bird deadlines close on 30 September.

THIS IS A PROPOSAL, NOT AN AUDIT

I do not know your internal pipeline, your pricing mechanics, or what the AEs are already running. Every priority here can be reordered in week one.

Agent roster and the 85% claim per lio.ai/product, company-reported. Event figures per the P1 budget plan.

Why me. Four things, with proof.

Not potential. Output you can inspect before day 0.

WHAT YOU GET

1 **An operator who ships unmanaged.**

This deck, the named-buyer list, the re-verified event programme, the LinkedIn audit and the H1 hypothesis test were **built before day 0, from public information.** That is the working speed you hire, not a promise of it.

2 **The outbound cold-start problem, already solved.**

219 named, titled, LinkedIn-linked buyers across four ICP segments, 193 of them with verified work emails, and an approach playbook for each. **The AEs and SDRs start warm.**

3 **A programme of about €1M run with owner-level care.**

17 P1 events, 204 staff-days, 10 sidecar dinners. The highest-ROI line in the GTM budget currently has **no single owner below the founders.** I am that owner.

4 **A profile that spans the room.**

Consulting rigour at A&M, investor pattern-matching at Biome VC, hands-on GTM engineering at SCAILE. **CFO-grade analysis down to SDR-grade execution.**

THE GUARANTEE

ZERO BULLSHIT

Lio promises customers **$10M in identified value, or donates $100K.** Same energy, scaled to me:

If after 90 days you would not enthusiastically re-hire me, I hand over the machine (documented, running, transferable) and we shake hands.

No ramp-up excuses. No knowledge hostage-taking.

90

DAYS TO PROVE IT.
THE MACHINE STAYS EITHER WAY.

The $10M-or-$100K challenge is Lio's own public offer, at lio.ai/10-million.

The base case returns the year-one salary thirteen times over.

A market-anchored ask, priced against the H1 thesis in three scenarios.

THE RETURN, H1 THESIS ARR IN YEAR ONE

€0-175K

KILL · ROTATE

The funnel fails its own gate.

0 to 1 contracts. Assessment to POC under 10%, POC to contract under 20%, which are **file 17's own kill thresholds.** The motion rotates to the next-best hypothesis. Phase 0 costs about €0, which is the whole point of testing before spending.

€1.35M

REFINE · NARROW BASE CASE

Signal in FS only. DACH stays captive.

About 2 FS-anchor wins at €500K plus 2 DACH change-event wins at €175K. **This is already today's read.** Zurich-Genpact is the one confirmed third-party BPO in 35 swept accounts.

€2.4M

CONFIRM · SCALE

Both segments clear the confirm bar.

About 3 FS and 5 DACH wins as the Renewal Radar scales from 35 to roughly 75 accounts and conversion clears **assessment to POC at 30%, POC to contract at 50%.** Carries into the funded Q1 and Q2-27 US wave once SOC 2 closes.

WHAT MOVES THESE NUMBERS

ACV. No public ACV exists. 7% of displaced cost is Lio's own disclosed mechanic. One verified POC replaces the whole estimate.

Radar scale. 35 accounts swept, 50 to 100 targeted. Every 10 added yields about 2 more Group-A triggers at today's 17% hit rate.

Segment mix. An FS win is worth about 3 times a DACH win. Invert which segment converts and the base case roughly halves.

THE ASK

MARKET-ANCHORED

€95-120K

BASE, YEAR 1 · ANCHOR €105K

Plus 0.05 to 0.15% equity, standard 4-year vest with a 1-year cliff.

Re-rated twice: at day 90, against the guarantee on the previous slide, and at the H1 decision gate in Jan or Feb 2027.

Munich and Berlin founders-associate postings run €51-90K per Glassdoor 2026. Scoped above that median for a CEO-and-CTO-office mandate and A&M and Biome-VC seniority, and deliberately under the US Series-A chief-of-staff band. A proposed anchor, not a demand.

13x

BASE-CASE ARR OVER YEAR-1 BASE.
CONFIRM CASE CLEARS IT 23 TIMES. ONLY KILL DOES NOT, WHICH IS EXACTLY WHAT THE TEST IS FOR.

Modeled, not forecast. ACV at about 7% of displaced BPO or SSC cost per file 08, funnel per file 17's decision gate. Full math in 21-compensation-and-arr-scenarios.md. Salary per Glassdoor Munich and Berlin, 2026.

ONE FOR ALL. ALL FOR PROCUREMENT.

Thank you

Ready to start before day 0. The machine is already running.
