

Pipeline, Rooms, & Proof

A day-0 plan for the founders' office — who buys Lio, where they gather, and the machine I would run to get them there

Who am I and what do I bring to the table?

Experience spans from consulting to VC.
Now driving Strategy, AI and GTM for SCAILE.

Experience

SCAILE Technologies

Driving Strategy, AI and GTM — building B2B go-to-market engines from scratch, from ICP research to outbound to AI search visibility.

Alvarez & Marsal

Advised Fortune 500 CEOs on restructuring their financial liabilities worth >\$100M.

Biome VC

Built an investment thesis that shaped the investment philosophy of a \$170M VC fund.

Education

Nova School of Business and Economics, Lisbon

FT #8 WORLDWIDE

MSc Finance. **Top 10% of class.**

Won top prize in National Case Study Competitions (among 15,000+ participants)

Why Lio

1 Shortest path to founding my own.

I want to found my own startup. Nothing gets me closer than the founders' office of a company at the inflection point — fresh off a \$30M a16z Series A, rebranding into a category, opening the US. This is the phase where I learn to lay the bricks //Rome was not built in one day.

2 Lio sells against a \$180B line, not a \$10B one — and I want to bet on it.

Everyone else builds procurement software. Lio replaces the execution labor — the same BPO scope at ~7% of cost. It is the sharpest enterprise wedge I have seen since I started working in GTM, and the market has barely heard it yet.

3 I like building things.

As a VC analyst I spent 100+ hours with founders and operators, learning what breaks. At SCAILE I build the playbook from scratch. For this application I already built Lio's: 219 named buyers — 193 with verified emails — of 2,245 identified, a re-verified 17-event program, and a 60-post share-of-voice audit — the working files ship with this deck.

The what, why and how

How this deck is structured and — most importantly — what I will drive once I join the team

How the deck is structured

01	Who buys Lio — the ICP, sourced and counted	FINDINGS
02	Where they gather — the event pipeline, re-verified	FINDINGS
03	What the market hears — LinkedIn share of voice	FINDINGS
04	What I would own from day 0	STRATEGY
05	Why hire me — what you get in return	THE OFFER

Brief Summary

- The ICP is countable:** 219 named buyers (of 2,245 identified) across 4 segments, sourced and enriched via Apollo — outbound can start on day 0.
- The event plan is live now:** the late-September gauntlet (San Diego → Cologne → Boston → Amsterdam) starts in two weeks; every date and deadline re-verified as of Aug 31.
- Share of voice is founder-heavy:** the company posts, the market barely echoes — a repeatable events→content loop is the cheapest fix.
- Everything ships with working files:** spreadsheets, CSVs, registers — not slideware.

Goals I want to achieve

Short-term Goals

- Own event ops end-to-end for Q3/Q4:** target lists per room, founder briefs, the sidecar dinners, and the next-day follow-ups nobody has time for.
- Stand up the ICP outbound engine:** keep the named-buyer list alive in Apollo, feed sequences with the AEs, and report what converts.
- Give Keil and Wagner leverage:** prep, notes, pipeline hygiene, and the analysis layer of the \$10M Challenge — founders' hours back, every week.

Long-term Goals

- Own a slice of the US field engine** as the NYC pod scales — the field-marketing layer the Q2-27 calendar already requires.
- Run the BPO-wedge campaign end to end:** from the SSOW/SIG rooms to qualified pilots — the “93% cheaper” story deserves its own funnel.
- Earn ownership of a revenue line:** complete ownership of one repeatable motion, the way Lio defines new roles for its customers.

Who buys Lio — a countable market, now with names

SEGMENT	BUYERS IN APOLLO	ON THE LIST	THE BUYING CENTER	HOW TO APPROACH
DACH INDUSTRIAL BACKBONE €1–12B · ~⅔ family/foundation-owned · Schaeffler, Brose, REHAU class	851 TITLED MATCHES	60 NAMED · LINKEDIN	CPO sponsors, COO/CFO signs (via the BPO/FTE line), Procurement Excellence champions, CIO gatekeepers.	Trust-first, German, in person. BME/Handelsblatt rooms + Principals dinners; reference Schaeffler & REHAU proof; overlay-not-replace message for conservative SAP estates.
INDIRECT-HEAVY INSURANCE & FS 100% indirect spend · Munich Re, ERGO class	156 TITLED MATCHES	40 NAMED · LINKEDIN	Head of Procurement / Sourcing & Vendor Mgmt ; compliance-heavy buying center, auditability is the door-opener.	Fastest agentic-BPO math in the portfolio. Lead with the 93%-cheaper wedge + auditable agents; Munich Re logo does the heavy lifting.
US F500 GBS & BPO OWNERS The people who sign outsourcing renewals · SSOW/SIG audience	895 TITLED MATCHES	60 NAMED · LINKEDIN	VP GBS / Shared Services, Head of P2P, GPOs — a persona classic procurement marketing barely reaches.	Budget capture, not budget creation. Every BPO renewal is a qualified opp with a price to beat by 93%; time outreach to renewal cycles; Petras + Walmart engagement as credibility.
DACH UTILITIES & MOBILITY Regulated, process-heavy · DB (“Loom” pilot), SWM, Lufthansa class	343 TITLED MATCHES	59 NAMED · LINKEDIN	Leiter Einkauf / Beschaffung + digitalization leads; works councils in the room from day one.	Follow the Deutsche Bahn breadcrumb. Regulated buyers move on references and auditability; German-language webinars → Bots & Buyers → pilot.

219

NAMED BUYERS ON THE LIST · 122 COMPANIES

The outbound cold-start problem is solved before day 0. Every contact carries title, company, location and LinkedIn URL; 193 carry verified work emails (198 with any email), including prospect CPOs at Allianz, Deutsche Bahn, E.ON, ServiceNow, Citi, Beiersdorf and Miele. Apollo identifies **2,245 titled buyers** matching the same filters (851 DACH industrial · 156 insurance/FS · 895 US GBS · 343 utilities/mobility) — the refill pool is documented and reusable. Full list, companies tab and the approach playbook: **Lio_ICP_Prospect_List.xlsx**

The rooms are picked — the machine needs an owner

THE GAUNTLET RUNS

4 P1 events + Bots & Buyers NYC · 18 days
· 2 continents. Split founders:
Keil+Heinzmann→Amsterdam,
Wagner+Petras→Boston.

Q3-2026 · IN 2 WEEKS	Q4-2026	Q1-2027	Q2-2027
SSON San Diego · Sep 14–17	SIG Fall Chicago · Oct 25–28 ▲	ProcureCon West Vegas · Mar 8–10 · committed	Handelsblatt Apr 6–7 · Gartner SC May 3–5 · NAPES tbd
+ Bots & Buyers NYC · Sep 23 (own)	SSOW DACH Berlin · Nov 17–19	SSOW Orlando · Mar 8–11 · BPO keynote	eLösungstage May 11–12 · WPC London May 18–20
ProcureCon EU Köln · Sep 22–24	BME-Symposium · Berlin · Nov 18–19	APC · Mar 22–24 · now New Orleans	DPW NY Jun 2–3 · Proc. Summit HH Jun 23–24
ProcureCon East Boston · Sep 28–30 · LEAD	Berlin double-week holds. ▲ B&B EU Munich (Oct 27–28, own) collides with SIG Chicago.	Same-week collision resolved: Keil→Orlando, Petras→Vegas.	7 events. Breaks the current team without the Jan-27 field-marketing hire.
DPW Amsterdam · Sep 30–Oct 1			
€165K new + €70K committed · 65 staff-days	€87K · 32 staff-days · cheapest, sharpest	€108K + €35K committed · 31 staff-days	€376K · 76 staff-days · the heavy quarter

Status check, six weeks after the plan was written: all four gauntlet dates hold. New since the plan: **Bots & Buyers went transatlantic** — NYC Sep 23 (application-only, mid-gauntlet) and the EU flagship Oct 27–28, now **colliding with SIG Chicago (Oct 25–28)**. APC 2027 moved **Miami → New Orleans** (Mar 22–24). NAPES' reported Denver move is **unverified** — hold the €35K. Two early-birds close **Sep 30**: BME-Symposium (€100) and eLösungstage (€300).

17

P1 EVENTS
Q3-26 → Q2-27

€736K new + €105K committed + 12% contingency ≈ €929K envelope · 204 staff-days · 10 sidecar dinners (€120K of it — the highest-ROI line, protect it last).

This program currently has no single owner below the founders. That is the job I am applying to do — starting with the four events that begin in two weeks.

What the market hears when Lio speaks

POSTS FOUND, BY WHO IS TALKING

Vladimir Keil (CEO) the channel, effectively		24
Lio company page incl. the askLio era		9
Third-party commentary analysts, influencers, reactions		9
Heinzmann & Wagner (CTO/COO)		7
Lio team (“Lions”) Petras, new-hire posts, FDE Night		7
Investors & network YC, a16z orbit		4
Customers despite a 150+ enterprise logo wall		0 posts found

Found via search-engine indexing of linkedin.com — a floor, not a census: LinkedIn's login wall hides an unknown share of posts. Direction is what matters.

60

DISTINCT POSTS
IN THE REGISTER

Share of voice is founder-heavy and customer-silent — an ops gap, not a budget gap. The events→content→advocacy loop I would run closes it. Full register with URLs, authors, dates and themes: 14- linkedin-posts.md

One voice carries 40% of the channel

Keil authors 24 of 60 indexed posts; the founder team together, 31. A single point of failure — and the cheapest amplifier available: founder-content ops (drafts, recaps, clips) multiplies an asset that already works.

The logo wall is silent

Zero customer-authored posts — despite award-grade stories at Schaeffler (MOU), REHAU (BME + Porsche Consulting AI Impact Award 2026) and Surventis. Every go-live, award and dinner should ship with a co-marketing ask. Nobody owns that ask today.

Moments, not a cadence

Activity spikes at the YC launch, the BME award, Schaeffler milestones and the Series A — then goes quiet. The 17-room P1 calendar — plus Lio's own franchises — is a built-in content engine if every room produces before/during/after posts. That loop needs an owner.

I own the machine between the founders and the pipeline — the list, the rooms, and the follow-through.

One line, because that is the job: everything repeatable that stands between a named buyer and a booked founder conversation. In practice, the first 90 days:

LIVE · DAY 0–30

The gauntlet

Four P1 events plus Bots & Buyers NYC in 18 days across two continents, starting in two weeks. I run the ops: **target lists per room, founder briefs, the sidecar dinners, next-day follow-ups**. The 219-name buyer list goes into sequences before the first flight.

NEXT · DAY 30–60

The wedge quarter

Berlin double-week + SIG Chicago — the rooms where **BPO-contract owners** sit. I own room prep and the follow-up motion, pipe every conversation into the CRM, and ship the first outbound-cohort report: what converted, what did not.

ONGOING · DAY 60–90

The machine, boring on purpose

Calendar → list → room → follow-up → pipeline, **measured weekly and running without heroics**. Founders get hours back; the Q1-27 US quarter starts planned, staffed, and booked early instead of rushed.

Why hire me — what you get in return

Not potential. Output you can inspect before day 0.

What you get

- 1

An operator in the founders' office who ships unmanaged.

This deck, the named-buyer ICP list, the re-verified event program and the LinkedIn audit were **built before day 0, from public information**. That is the working speed you hire, not a promise of it.
- 2

The outbound cold-start problem, already solved.

A list of 219 named, titled, LinkedIn-linked buyers — 193 with verified work emails — across Lio's four ICP segments with an approach playbook — **the AEs and SDRs start warm**, and the list machine keeps refilling it.
- 3

A ~€1M event program run with owner-level care.

17 P1 events, 204 staff-days, 10 sidecar dinners — the highest-ROI line in the GTM budget currently has **no single owner below the founders**. I am that owner: deadlines tracked, rooms prepped, every conversation followed up.
- 4

A profile that spans the room.

Consulting rigor (A&M, Fortune 500 CFO work), investor pattern-matching (Biome VC), and hands-on GTM engineering (SCAILE). **CFO-grade analysis down to SDR-grade execution** — the exact range a founders' associate needs.

The zero-bullshit guarantee

Lio promises customers **\$10M in identified value — or donates \$100K**. Same energy, scaled to me:

If after 90 days you would not enthusiastically re-hire me, I hand over the machine — documented, running, transferable — and we shake hands.

No ramp-up excuses. No knowledge hostage-taking. Zero bullshit.

90

DAYS TO PROVE IT.

THE MACHINE STAYS EITHER WAY.

Thank
You!

Appendix — the working files

Every claim in this deck has a file behind it. Nothing here is slideware.

SPREADSHEET

Lio_ICP_Prospect_List.xlsx · 13-icp-prospect-list.md

Named-buyer list across 4 ICP segments — companies, titled contacts with LinkedIn URLs, Apollo match totals, per-persona approach playbook, executive summary.

SPREADSHEET

16-event-status-update.md + Lio_P1_Event_Status_2026-08-31.csv

60 scored events across US/UK/EU-DACH, P1/P2/P3 tiers — every P1 date, venue and deadline re-verified against organizer sources; passed deadlines flagged, changes annotated.

SPREADSHEET

Lio_P1_Budget_Staffing.csv

Quarter-by-quarter budget & staffing for the 17-event P1 program: €736K new + €105K committed + contingency ≈ €929K, 204 staff-days, founder allocation, hiring triggers, decision deadlines.
